

# Audio-Visual Technology

Level up your communication with AV solutions outfitted for your business. Adding visual elements to your presentations, lectures, and meetings will transform your audience from listeners to collaborators - ensuring your message is not only heard but remembered.

Elevate communication and engagement at your office with our audio-visual solutions.

## Interactive Whiteboards and Displays

Exchange ideas in real-time. Connect mobile devices to edit and learn together. With network and touch-screen capabilities, our interactive displays enhance meetings and teaching.

## Collaboration Spaces

Enable virtual attendees to see everyone in the room, share screens and files, live-edit documents together, chat, and more by combining interactive displays + cloud phone systems.

## Meeting Room Scheduler

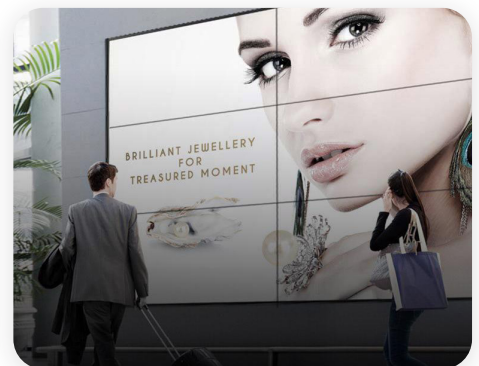

Ideal for lobbies, hallways, or outside of any meeting space that requires a quick and easy visual means of displaying room availability.

## Indoor Digital Signage

Take your signage to the next level. Offerings include wayfinding, digital menus, promotion boards for retail, healthcare, and more.

## Video Projection

Grab attention in busy environments, capture audiences' focus, and save space without sacrificing display quality - even in well-lit areas.

## The RJ Young Difference

*Customize, Implement, Support*

Our specialists work with you to discover which technologies fit your business. Once decided, we'll take care of installation and set-up so your teams can start using them right away. From there, we'll provide ongoing support and training.

*"If we need something, all we have to do is describe the idea and RJ Young will come up with a solution that fits what we're looking for."*

**Ricky Richardson, Director of Technology, Promise Academy**
